

# LUMINANCE® COLOR

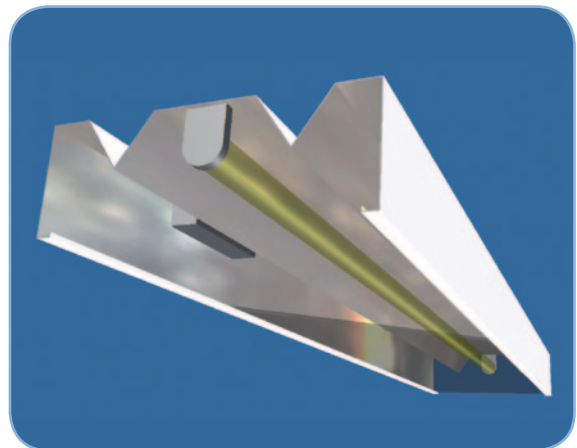

## ⇒ Product Overview

**Luminance Color** is the new solution for lighting industry to produce **housing and reflectors** with only **one metal sheet** !

This material has **one side with reflective layer** and **one pre-painted side**.

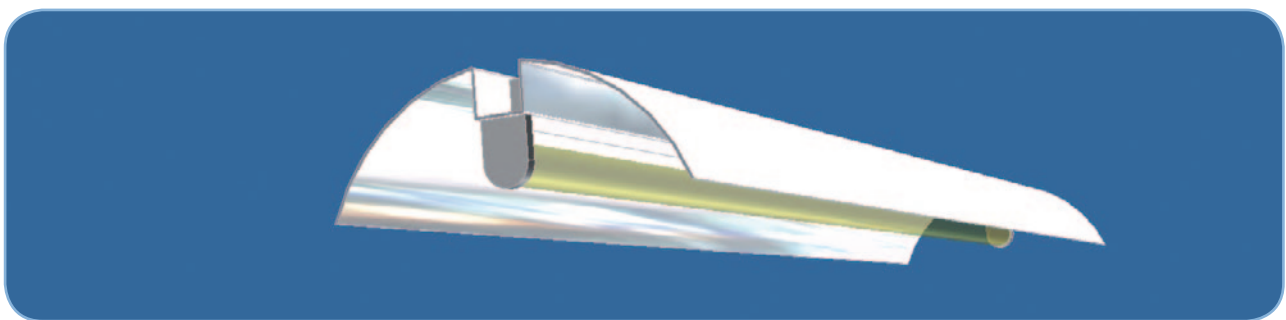

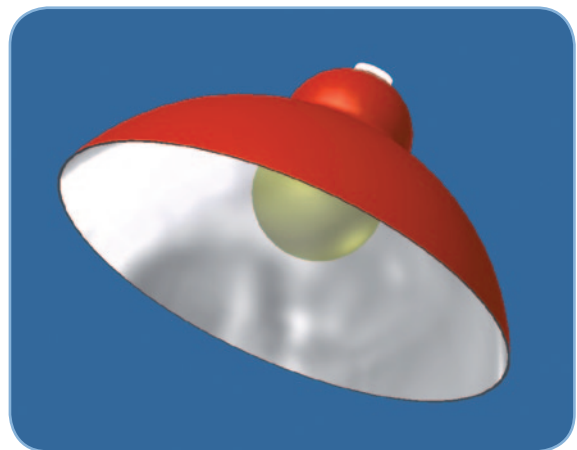

By **removing aluminium** reflector, lighting manufacturers would save material purchases but also profiling and fixing aluminium parts.

The product leads to new design possibilities to **reduce the cost** of new industrial or office fixtures.

## ⇒ Specifications

- Reflective side: highly diffuse, diffuse or specular
- Pre-painted side: large range of colors
- Thickness: 0.18, 0.27, 0.40 or 0.50mm  
Other thicknesses are available on request
- Delivery format: coils, slit coils or sheets
- Standard packaging: paper on wooden pallet
- Temporary protection: strippable film on reflective side
